

✓ MongoDB Array Operators Questions (Beginner) – 100 Questions

♦ \$slice (10 Questions)

1. Ek document me **comments** array ke sirf first 5 elements kaise fetch karoge using **\$slice**?
 2. **reviews** array ke last 3 elements kaise retrieve karoge?
 3. **students** array me se first 10 records kaise nikaloge?
 4. **orders** array ke sirf first 2 orders kaise show karoge?
 5. **logs** array ke last 5 logs kaise fetch karoge?
 6. **messages** array me se middle ke 5 messages kaise retrieve karoge using **\$slice** with skip?
 7. **products** array me se first 1 product kaise get karoge?
 8. **history** array me se last 1 record kaise fetch karoge?
 9. **scores** array me se first 4 scores kaise retrieve karoge?
 10. **notifications** array ke last 10 items kaise nikaloge?
-

♦ \$in (15 Questions)

11. **category** field me "mobile" ya "laptop" ho toh documents kaise find karoge using **\$in**?
12. **age** field agar 18, 20, 25 me se koi ho toh users kaise fetch karoge?
13. **status** agar "active" ya "pending" ho toh records kaise retrieve karoge?

14. **city** agar "Delhi", "Mumbai", "Pune" ho toh users kaise filter karoge?
 15. **role** agar "admin" ya "manager" ho toh accounts kaise find karoge?
 16. **price** agar 1000, 1500, 2000 me se koi ho toh products kaise search karoge?
 17. **rating** agar 3, 4, 5 ho toh products kaise retrieve karoge?
 18. **department** agar "IT", "HR" ho toh employees kaise fetch karoge?
 19. **course** agar "Java", "Python" ho toh students kaise find karoge?
 20. **language** agar "Hindi", "English" ho toh users kaise filter karoge?
 21. **brand** agar "Apple", "Samsung" ho toh products kaise search karoge?
 22. **gender** agar "male" ya "female" ho toh records kaise retrieve karoge?
 23. **month** agar 1,2,3 ho toh documents kaise filter karoge?
 24. **year** agar 2022 ya 2023 ho toh records kaise find karoge?
 25. **paymentMode** agar "cash", "upi", "card" ho toh orders kaise retrieve karoge?
-

◆ \$all (15 Questions)

26. **tags** array me "mongodb" aur "database" dono present ho toh documents kaise find karoge?
27. **skills** array me "Java" aur "Node" dono ho toh employees kaise retrieve karoge?
28. **subjects** array me "Math" aur "Science" dono ho toh students kaise filter karoge?
29. **features** array me "wifi" aur "bluetooth" dono ho toh products kaise search karoge?

30. **hobbies** array me "cricket" aur "music" dono ho toh users kaise find karoge?
 31. **colors** array me "red" aur "black" dono ho toh items kaise retrieve karoge?
 32. **permissions** array me "read" aur "write" dono ho toh users kaise filter karoge?
 33. **languages** array me "Hindi" aur "English" dono ho toh profiles kaise find karoge?
 34. **categories** array me "men" aur "shoes" dono ho toh products kaise search karoge?
 35. **ingredients** array me "milk" aur "sugar" dono ho toh items kaise retrieve karoge?
 36. **citiesVisited** array me "Delhi" aur "Goa" dono ho toh users kaise filter karoge?
 37. **courses** array me "DBMS" aur "OS" dono ho toh students kaise find karoge?
 38. **tools** array me "Git" aur "Docker" dono ho toh employees kaise retrieve karoge?
 39. **genres** array me "action" aur "thriller" dono ho toh movies kaise search karoge?
 40. **devices** array me "mobile" aur "tablet" dono ho toh users kaise filter karoge?
-

◆ \$push (15 Questions)

41. **skills** array me ek naya skill "MongoDB" add karna ho toh **\$push** kaise use karoge?
42. **comments** array me new comment add karna ho toh query kaise likhoge?
43. **tags** array me "backend" push karna ho toh kaise karoge?

44. `orders` array me ek new order object push karna ho toh kaise update karoge?
 45. `history` array me ek naya entry push karna ho toh query kaise hogi?
 46. `messages` array me new message add karna ho toh `$push` kaise use karoge?
 47. `notifications` array me ek item add karna ho toh kaise karoge?
 48. `reviews` array me new review push karna ho toh kaise likhoge?
 49. `subjects` array me "English" add karna ho toh query kaise hogi?
 50. `visitedCities` array me "Jaipur" push karna ho toh kaise update karoge?
 51. `scores` array me new score add karna ho toh query kaise hogi?
 52. `friends` array me new friendId push karna ho toh kaise likhoge?
 53. `emails` array me new email push karna ho toh query kaise hogi?
 54. `phones` array me ek number add karna ho toh `$push` kaise use karoge?
 55. `items` array me new item push karna ho toh query kaise hogi?
-

◆ `$addToSet` (10 Questions)

56. `skills` array me "MongoDB" add karna ho but duplicate avoid karna ho toh kaunsa operator use karoge?
57. `tags` array me "sale" add karna ho without duplicates, query kaise hogi?
58. `citiesVisited` array me "Goa" add karna ho but already exist ho toh repeat na ho, kaise karoge?
59. `friends` array me new friendId add karna ho without duplicates, kaise update karoge?
60. `courses` array me "NodeJS" add karna ho but duplicate na bane, query kaise hogi?

61. `permissions` array me "write" add karna ho but duplicate avoid karna ho, kaise karoge?
 62. `emails` array me ek email add karna ho without repeat, kaise update karoge?
 63. `numbers` array me 10 add karna ho but duplicate na ho, query kaise hogi?
 64. `likedPosts` array me postId add karna ho without duplicate, kaise karoge?
 65. `savedItems` array me itemId add karna ho without duplicates, kaise update karoge?
-

◆ **\$each (10 Questions)**

66. `skills` array me ek saath 3 skills add karne ho ("Java","MongoDB","Node"), `$each` kaise use karoge?
67. `tags` array me multiple tags add karne ho, query kaise likhoge?
68. `numbers` array me multiple values add karne ho, `$each` kaise use karoge?
69. `friends` array me multiple friendIds add karne ho, kaise update karoge?
70. `comments` array me multiple comments add karne ho, query kaise hogi?
71. `subjects` array me multiple subjects add karne ho, kaise push karoge?
72. `orders` array me multiple orders objects insert karne ho, `$each` kaise use karoge?
73. `messages` array me multiple messages add karne ho, query kaise hogi?
74. `notifications` array me multiple values push karne ho, kaise update karoge?

75. `emails` array me multiple emails insert karne ho, `$each` kaise use karoge?

♦ `$position` (5 Questions)

76. `skills` array me "MongoDB" ko start (0 index) pe insert karna ho toh `$position` kaise use karoge?

77. `tags` array me new tag ko second position pe add karna ho toh query kaise hogi?

78. `comments` array me new comment ko first position pe insert karna ho toh kaise update karoge?

79. `notifications` array me item ko beginning me insert karna ho toh `$position` kaise use karoge?

80. `friends` array me new friendId ko index 1 pe add karna ho toh query kaise likhoge?

♦ `$sort` (5 Questions)

81. `scores` array ko descending order me store karna ho while pushing new scores, `$sort` kaise use karoge?

82. `ratings` array ko ascending order me maintain karna ho, `$push` + `$sort` kaise use karoge?

83. `prices` array me new value push karne ke baad array sort karna ho, query kaise hogi?

84. `dates` array ko latest first order me sort karna ho, `$sort` kaise use karoge?

85. `marks` array ko ascending sort karna ho after adding values, query kaise likhoge?

♦ \$pop (5 Questions)

86. `comments` array ka last element delete karna ho toh `$pop` kaise use karoge?
 87. `notifications` array ka first element remove karna ho toh `$pop` query kaise hogi?
 88. `history` array ka last record remove karna ho toh query kaise likhoge?
 89. `messages` array ka first message delete karna ho toh `$pop` kaise use karoge?
 90. `scores` array ka last score remove karna ho toh query kaise hogi?
-

♦ \$pull (5 Questions)

91. `skills` array se "Java" remove karna ho toh `$pull` kaise use karoge?
 92. `tags` array se "sale" delete karna ho toh query kaise likhoge?
 93. `numbers` array se 0 remove karna ho toh `$pull` kaise use karoge?
 94. `friends` array se ek specific friendId remove karna ho toh query kaise hogi?
 95. `citiesVisited` array se "Delhi" remove karna ho toh `$pull` query kaise hogi?
-

♦ \$pullAll (5 Questions)

96. `skills` array se "Java" aur "Python" dono remove karne ho toh `$pullAll` kaise use karoge?

97. `tags` array se multiple tags remove karne ho ("old","expired"), query kaise hogi?
98. `numbers` array se multiple values remove karne ho (1,2,3), `$pullAll` kaise use karoge?
99. `citiesVisited` array se multiple cities remove karne ho ("Goa","Pune"), query kaise likhoge?
100. `items` array se multiple items remove karne ho ek saath, `$pullAll` query kaise hogi?
