

✓ MongoDB Notes (Beginner Level)

♦ Mongosh (MongoDB Shell)

MongoDB shell ko terminal me start karne ke liye:

```
mongosh
```

♦ Database Commands

✓ Show all databases

```
show dbs
```

✓ Select / Switch database

```
use database_name
```

Agar database exist nahi karta, to MongoDB usko tab banata hai jab tum pehli baar data insert karoge.

✓ Current database check karna

```
db
```

♦ Collection Commands

✓ Show all collections

```
show collections
```

✓ MongoDB Insert Functions

♦ insertOne()

Ek document insert karta hai.

```
db.students.insertOne({  
  name: "Rahul",  
  age: 20,  
  grade: "A",  
  city: "Delhi"  
})
```

♦ insertMany()

Multiple documents insert karta hai.

```
db.books.insertMany([  
  { title: "JavaScript Basics", author: "John", price: 300, category:  
    "Technology" },  
  { title: "MongoDB Guide", author: "David", price: 450, category:  
    "Database" }  
])
```

✓ MongoDB Find Functions

♦ find()

Multiple documents return karta hai.

```
db.students.find()
```

Query ke saath:

```
db.students.find({ city: "Delhi" })
```

Projection ke saath (specific fields return karna):

```
db.students.find({}, { name: 1, age: 1 })
```

`_id` default aata hai. Agar `_id` nahi chahiye:

```
db.students.find({}, { name: 1, age: 1, _id: 0 })
```

♦ **findOne()**

Sirf ek matching document return karta hai.

```
db.books.findOne({ title: "JavaScript Basics" })
```

Projection ke saath:

```
db.books.findOne({ title: "JavaScript Basics" }, { title: 1, price: 1, _id: 0 })
```

✅ **MongoDB limit()**

♦ **limit(n)**

Sirf n documents return karta hai.

```
db.students.find().limit(3)
```

✓ MongoDB Practice Questions (120+ Hinglish Questions)

■ Section 1: insertOne() Practice (1–20)

1. Please students collection me ek document insert karo jisme fields ho: name, age, grade, city.
2. Please students collection me ek student insert karo jiska name "Aman", age 21, grade "B", city "Mumbai" ho.
3. Please students collection me ek student insert karo jiska name "Neha", age 19, grade "A", city "Pune" ho.
4. Please students collection me ek document insert karo jisme name "Riya", age 22, grade "C", city "Delhi" ho.
5. Please students collection me ek student insert karo jiska name "Karan", age 20, grade "A", city "Jaipur" ho.
6. Please students collection me ek student insert karo jiska name "Sahil", age 18, grade "B", city "Lucknow" ho.
7. Please students collection me ek student insert karo jiska name "Priya", age 23, grade "A", city "Bhopal" ho.
8. Please students collection me ek student insert karo jiska name "Anjali", age 20, grade "C", city "Noida" ho.
9. Please students collection me ek student insert karo jiska name "Rohit", age 24, grade "B", city "Chandigarh" ho.
10. Please students collection me ek student insert karo jiska name "Simran", age 19, grade "A", city "Amritsar" ho.
11. Please students collection me ek student insert karo jiska name "Vikas", age 22, grade "B", city "Kolkata" ho.
12. Please students collection me ek student insert karo jiska name "Ishaan", age 21, grade "A", city "Hyderabad" ho.
13. Please students collection me ek student insert karo jiska name "Meera", age 20, grade "C", city "Indore" ho.
14. Please students collection me ek student insert karo jiska name "Nitin", age 25, grade "B", city "Patna" ho.
15. Please students collection me ek student insert karo jiska name "Divya", age 18, grade "A", city "Ranchi" ho.

16. Please students collection me ek student insert karo jiska name "Harsh", age 23, grade "B", city "Gurgaon" ho.
 17. Please students collection me ek student insert karo jiska name "Pooja", age 19, grade "C", city "Kanpur" ho.
 18. Please students collection me ek student insert karo jiska name "Deepak", age 21, grade "A", city "Agra" ho.
 19. Please students collection me ek student insert karo jiska name "Sneha", age 22, grade "B", city "Surat" ho.
 20. Please students collection me ek student insert karo jiska name "Arjun", age 20, grade "A", city "Ahmedabad" ho.
-

Section 2: insertMany() Practice (21–40)

21. Please books collection me minimum 4 books insert karo with fields: title, author, price, category.
22. Please books collection me 5 books insert karo jisme category "Technology" ho.
23. Please books collection me 4 books insert karo jisme 2 books category "Fiction" ho.
24. Please books collection me 6 books insert karo with random price values.
25. Please books collection me 4 books insert karo jisme authors repeat ho rahe ho.
26. Please books collection me 5 books insert karo jisme ek book ka title "JavaScript Basics" ho.
27. Please books collection me 4 books insert karo jisme ek book ka category "Database" ho.
28. Please books collection me 5 books insert karo jisme ek book ka price 999 ho.
29. Please books collection me 4 books insert karo jisme sabka category different ho.
30. Please books collection me 6 books insert karo jisme 3 books same author ke ho.

31. Please students collection me insertMany() use karke 5 students add karo.
 32. Please students collection me insertMany() use karke 8 students add karo.
 33. Please students collection me insertMany() use karke 4 students add karo jinke grade "A" ho.
 34. Please students collection me insertMany() use karke 4 students add karo jinke city "Delhi" ho.
 35. Please students collection me insertMany() use karke 6 students add karo jinke age 18 to 25 ke beech ho.
 36. Please books collection me insertMany() use karke 7 books add karo.
 37. Please books collection me insertMany() use karke 4 books add karo jisme price 200 se 500 ke beech ho.
 38. Please books collection me insertMany() use karke 5 books add karo jisme category "Education" ho.
 39. Please books collection me insertMany() use karke 4 books add karo jisme title unique ho.
 40. Please books collection me insertMany() use karke 10 books add karo (practice ke liye).
-

Section 3: find() Basic Retrieval (41–55)

41. Please students collection se saare documents retrieve karo.
42. Please books collection se saare documents retrieve karo.
43. Please students collection ka output readable banane ke liye properly find() run karo.
44. Please books collection ka output check karo using find().
45. Please students collection me total inserted students ko find() se check karo.
46. Please books collection me total inserted books ko find() se check karo.

47. Please students collection me sirf city "Delhi" wale students retrieve karo.
 48. Please students collection me sirf grade "A" wale students retrieve karo.
 49. Please students collection me age 20 wale students retrieve karo.
 50. Please books collection me category "Technology" wali books retrieve karo.
 51. Please books collection me category "Fiction" wali books retrieve karo.
 52. Please books collection me author "John" wali books retrieve karo.
 53. Please books collection me price 500 wali books retrieve karo.
 54. Please students collection me city "Mumbai" wale students retrieve karo.
 55. Please students collection me grade "B" wale students retrieve karo.
-

Section 4: Projection Practice (56–75)

56. Please students collection se saare students retrieve karo but sirf name and age show karo.
57. Please students collection se sirf name and city return karo.
58. Please students collection se sirf name and grade return karo.
59. Please students collection se sirf age and grade return karo.
60. Please students collection se sirf city return karo.
61. Please books collection se saare documents retrieve karo but sirf title and author return karo.
62. Please books collection se sirf title and price return karo.
63. Please books collection se sirf title and category return karo.
64. Please books collection se sirf author and category return karo.
65. Please books collection se sirf price return karo.
66. Please students collection se name and age return karo but _id hide karo.

67. Please books collection se title and author return karo but `_id` hide karo.
 68. Please books collection se title and price return karo but `_id` hide karo.
 69. Please students collection se name, grade return karo but `_id` hide karo.
 70. Please students collection se sirf grade return karo and `_id` hide karo.
 71. Please books collection se sirf category return karo and `_id` hide karo.
 72. Please books collection se sirf author return karo and `_id` hide karo.
 73. Please students collection se sirf age return karo and `_id` hide karo.
 74. Please students collection se name and city return karo but `_id` hide karo.
 75. Please books collection se title and category return karo but `_id` hide karo.
-

Section 5: findOne() Practice (76–95)

76. Please books collection me se ek book retrieve karo jiska title "JavaScript Basics" ho.
77. Please books collection me se ek book retrieve karo jiska category "Technology" ho.
78. Please books collection me se ek book retrieve karo jiska author "David" ho.
79. Please students collection me se ek student retrieve karo jiska name "Aman" ho.
80. Please students collection me se ek student retrieve karo jiska city "Delhi" ho.
81. Please students collection me se ek student retrieve karo jiska grade "A" ho.

82. Please books collection me se findOne() use karke sirf title and price return karo where title = "JavaScript Basics".
 83. Please books collection me se findOne() use karke sirf title and author return karo where category = "Technology".
 84. Please books collection me se findOne() use karke sirf author and price return karo where title = "MongoDB Guide".
 85. Please books collection me se findOne() use karke sirf title return karo where author = "John".
 86. Please students collection me se findOne() use karke sirf name and age return karo where name = "Neha".
 87. Please students collection me se findOne() use karke sirf name and city return karo where grade = "B".
 88. Please students collection me se findOne() use karke sirf grade return karo where name = "Riya".
 89. Please books collection me se findOne() use karke sirf category return karo where title = "JavaScript Basics".
 90. Please books collection me se findOne() use karke sirf title and category return karo where price = 999.
 91. Please students collection me se findOne() use karke sirf name return karo where age = 20.
 92. Please students collection me se findOne() use karke sirf city return karo where name = "Karan".
 93. Please books collection me se findOne() use karke sirf title and price return karo where category = "Education".
 94. Please books collection me se findOne() use karke sirf title return karo where category = "Database".
 95. Please students collection me se findOne() use karke sirf name and grade return karo where city = "Pune".
-

Section 6: limit() Practice (96–115)

96. Please students collection se sirf 3 documents retrieve karo using limit().

97. Please students collection se sirf 5 documents retrieve karo using limit().
98. Please students collection se sirf 1 document retrieve karo using limit().
99. Please books collection se sirf 2 documents retrieve karo using limit().
100. Please books collection se sirf 4 documents retrieve karo using limit().
101. Please books collection se sirf 1 document retrieve karo using limit().
102. Please students collection se name and age return karo but limit sirf 3 rakho.
103. Please students collection se name and city return karo but limit sirf 2 rakho.
104. Please students collection se grade and city return karo but limit sirf 4 rakho.
105. Please books collection se title and author return karo but limit sirf 3 rakho.
106. Please books collection se title and price return karo but limit sirf 2 rakho.
107. Please books collection se author and category return karo but limit sirf 5 rakho.
108. Please books collection se sirf category return karo but limit sirf 4 rakho.
109. Please students collection se sirf age return karo but limit sirf 6 rakho.
110. Please students collection se sirf name return karo but limit sirf 10 rakho.
111. Please books collection se sirf title return karo but limit sirf 7 rakho.
112. Please students collection se sirf grade return karo but limit sirf 5 rakho.
113. Please books collection se sirf price return karo but limit sirf 3 rakho.
114. Please books collection se title and category return karo but limit sirf 2 rakho.

115. Please students collection se name and grade return karo but limit sirf 3 rakho.

Section 7: Mixed Practice (116–140)

116. Please students collection me ek student insert karo, phir usko findOne() se retrieve karo.
117. Please books collection me ek new book insert karo, phir usko projection ke saath retrieve karo.
118. Please students collection me 5 students insertMany() se insert karo, phir find().limit(3) run karo.
119. Please books collection me 6 books insertMany() se insert karo, phir find().limit(2) run karo.
120. Please students collection se saare students retrieve karo but sirf name return karo and limit(5) lagao.
121. Please books collection se saari books retrieve karo but sirf title return karo and limit(3) lagao.
122. Please books collection se category "Technology" wali books retrieve karo but sirf title and author show karo.
123. Please students collection se grade "A" wale students retrieve karo but sirf name and city show karo.
124. Please students collection se city "Delhi" wale students retrieve karo but sirf name and age show karo.
125. Please books collection se price 500 wali books retrieve karo but sirf title and category show karo.
126. Please books collection me "JavaScript Basics" title wali book ko findOne() se nikalo but sirf title and price show karo.
127. Please students collection me age 20 wale students retrieve karo but sirf name and grade show karo.
128. Please books collection me author "John" wali books retrieve karo but sirf title show karo.
129. Please students collection me grade "B" wale students retrieve karo but sirf name show karo and limit(2) lagao.

130. Please books collection me category "Fiction" wali books retrieve karo but sirf title and author show karo and limit(3) lagao.
 131. Please students collection me ek student insert karo jiska city "Delhi" ho, phir find() se Delhi students check karo.
 132. Please books collection me ek new book insert karo category "Technology" me, phir findOne() se check karo.
 133. Please students collection se sirf name and age retrieve karo but _id hide karo and limit(4) lagao.
 134. Please books collection se sirf title and author retrieve karo but _id hide karo and limit(5) lagao.
 135. Please books collection se sirf price retrieve karo but _id hide karo and limit(3) lagao.
 136. Please students collection se sirf city retrieve karo but _id hide karo and limit(6) lagao.
 137. Please books collection se sirf category retrieve karo but _id hide karo and limit(2) lagao.
 138. Please students collection se ek student findOne() karo jiska grade "A" ho and sirf name show karo.
 139. Please books collection se ek book findOne() karo jiska category "Database" ho and sirf title show karo.
 140. Please students collection se first 3 students retrieve karo and sirf name and grade show karo.
-

Extra Practice Challenge (Advanced Thinking, Still Same Commands)

141. Please students collection me 10 students insertMany() se add karo and ensure karo sabki age different ho.
142. Please books collection me 10 books insertMany() se add karo and ensure karo 3 categories repeat ho.
143. Please students collection se sirf 5 documents nikalo but sirf name show karo.

144. Please books collection se sirf 5 documents nikalo but sirf title and price show karo.
145. Please books collection me se findOne() karo where category = "Technology" and only author return karo.
